<b>SPACE AND FACILITIES DATA BASE MANAGEMENT SYSTEM USER'S MANUAL</b>	<b>Subject</b>  Introduction and System Overview	<b>Revision</b> April 2007	<b>Chapter</b> Chapter 1
		<b>Effective</b> July 27, 2004	<b>Page</b> 1.1

This manual has been prepared by the Space and Facilities Data Base (SFDB) management team of the Capital Planning Design and Construction (CPDC) department along with the assistance of the Chancellor's Office Information Technology Services (CITS) department of the California State University Chancellor's Office for the users of the SFDB management system.

### **Purposes of the manual**

1. Describe the process and definitions by which space and facilities are inventoried on the California State University campuses.
2. Serve as a clear and concise reference document for users of space and facilities database.

### **Why a space and facilities inventory?**

Each campus maintains its own space and facilities inventory that provides planning and management data. The data provided by each campus during an annual reporting period to the SFDB, which is maintained at CPDC of the Chancellor's Office, provides information about: (1) facilities and (2) rooms within the facilities. It also serves as the campuses' official record of existing spaces. The SFDB is used in the analysis of the capital outlay budget change proposals (COBCP), space needs, space utilization, and other space and facility related issues and reports.

### **Background information about the system**

An earlier version of this system was originally developed at San Diego State University (SDSU) for use by the Facilities Planning department. The SDSU system was programmed initially by Angela J. Stoltz. They are responsible for keeping records of all the existing and planned facilities at SDSU. Historically, these records were maintained on a batch oriented mainframe computer system at the Office of the Chancellor. The information for SDSU was stored on a CYBER computer along with the space inventory of the other nineteen California State University (CSU) campuses. Because this system had certain limitations, the employees of the Facilities Planning department, using personal computers and spreadsheet software, developed a small database of their own during 1988/89.

In September of 1989, the Facilities Planning department asked Business Information Systems of SDSU to provide some assistance in automating their system. Their objectives were:

- a) Develop a database that will combine information from multiple buildings into a single report.
- b) Provide for capability to add additional data elements in the future, as needs change.
- c) Allow the departmental users to write their own SQL language reports with little or no support from computer professionals.

<b>SPACE AND FACILITIES DATA BASE MANAGEMENT SYSTEM USER'S MANUAL</b>	<b>Subject</b>	<b>Revision</b> April 2007	<b>Chapter</b> Chapter 1
	Introduction and System Overview	<b>Effective</b> July 27, 2004	<b>Page</b> 1.2

Business Information Systems designed and programmed a system using a powerful database system — ORACLE.

In 1991, this system was further modified by Chancellor's Office personnel to replace the CYBER system and help support the systemwide needs. At that time, the system was implemented on an IBM RISC-6000 computer. The system consisted of multiple menus, update screens (called "forms"), inquiry screens (similar to forms, but with no fields which may be altered), pre-defined reports, and a SQL-based report writer tool providing the users with the ability to generate their own reports.

To keep pace with the ever-changing world of technology, the CPDC Space Management team and CITS continue to enhance the SFDB. The most recent enhancements were to make the SFDB accessible via the Internet, including standardized reports that are laser printable.

### **Classes of data**

There are two basic types of data: (1) facilities and (2) space.

The facilities file includes the following information: campus code, center code, facility number, facility suffix, facility name, structure number, number of floors, gross square feet, custodial square footage, farm square feet, gross acreage, year/cost renovation, category, condition, construction type, master plan status, budgeted cost, capitalized cost, funding source, multiple funding source, reportable, ownership code, completion date.

The space file describes the current use of the space and includes the following information: campus code, center code, facility number, facility suffix, space number, space suffix, assignable square feet, function code, space type, discipline, instructional level, station type, station count, school code, department code, room status.

### **Schedule**

The SFDB is updated annually, though campuses may update their local systems more frequently. The "reporting window" is announced in an annual call letter.

### **Reporting Methods**

There are two methods of reporting space updates: **Option 1) Select and upload a submission file** and **Option 2) Data Entry Screen** (see Chapter 3 for details). Both options are available through online access.

<b>SPACE AND FACILITIES DATA BASE MANAGEMENT SYSTEM USER'S MANUAL</b>	<b>Subject</b>  Introduction and System Overview	<b>Revision</b> April 2007	<b>Chapter</b> Chapter 1
		<b>Effective</b> July 27, 2004	<b>Page</b> 1.3

### Space Master File Update

After the completion of the Chancellor's Office approval process, the files are merged into the SFDB space master file that is used to produce certain standard reports (see Chapter 4 for list of standard reports), as well as ad hoc reports using BrioQuery.

### Concepts

Forms (or screens) are highly flexible programs that allow a user to easily update or view data in the database. There are three concepts of which the user must be aware.

The first concept involves understanding when the user is able to update a record in the database. Before a record can be viewed, modified or deleted, the record must first be brought into the working area of the form. This is done by "Query"ing the database. (see page 3.12 for detailed instructions on how to "Query")

The second has to do with which fields of a record the user can update. The user may not update the primary key of a record. The primary key of a record is a unique identifier, which is a combination of campus code, center code, facility number, facility suffix, space number, and space suffix. If, for some reason, the primary key of a record had changed, the user would be required to delete the old record and insert a new record with a new primary key. For example, if a space number changed from '1001' to '2001', the record in the database for space number '1001' should be deleted, and a new record for space number '2001' created. The user may not simply change the space number field in the record to be '2001' instead of '1001'. If the facility number changes and the room numbers and the space data remain the same, the Developer designed a special mini-program to change a facility number (and update the space records that are linked to that facility number), which is for use by the CPDC Space Management team only. Campuses should contact the CPDC Space Management team concerning use of this batch update.

The third concept relates to locating where to update data. The user may not change a **display only** field on screen. A display only field is one that has been derived by looking up a value in another table. The user must find the table from which the value was obtained and update that table. For example, to update the description of the space code, the user must use the form that allows updating of the space code table. The user may not move to the space code description field and change the value in the screen that allows updating of room data. The description is only displayed on the screen for the ease in verifying that the correct space code was entered. (See Chapter 5 to see how to viewed, modified, and/or delete records.)

### **System Interfaces**

The SFDB interfaces with other systems, among them:

- Academic Program Data Base (APDB)
- Custodial Reporting
- Facility Utilization Reports

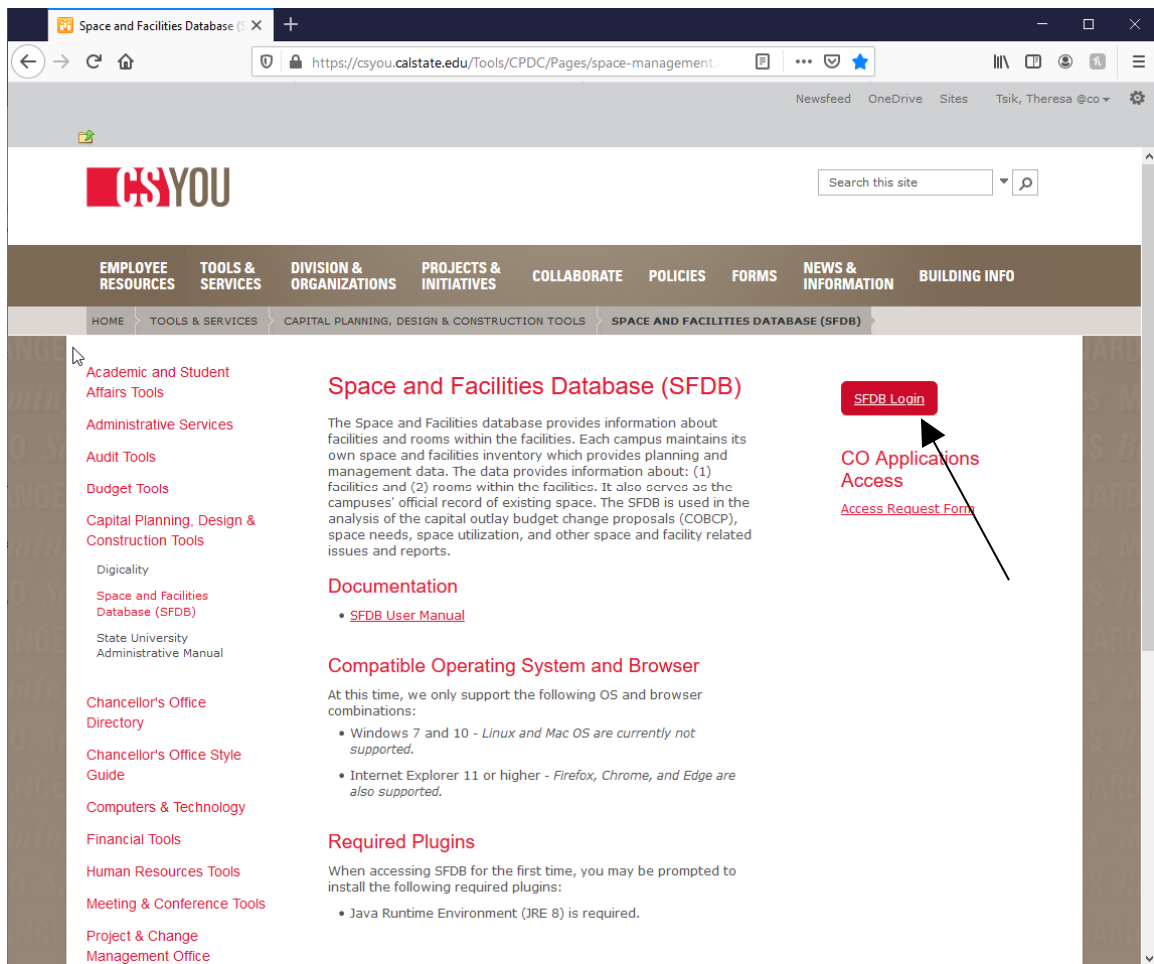

### **Intended Users of the System and Their Responsibilities**

The primary users of the system are the employees of the California State University system. It is designed so that anyone in the system may be given access with each user provided with an operator identification and password. Users' access can be tailored to their needs for control of updates and data security.

The previous chapter provided basic and general information about the SFDB. This chapter gives a brief overview of all the operating procedures for the SFDB management system and how to use this unique application.

SFDB can be accessed through the Space Management webpage  
<https://csyou.calstate.edu/Tools/CPDC/Pages/space-management.aspx>

## Logging In

An individual window will open and the following logon screen will appear. Enter username and password to get started:

**Username:** sfdbxxxxx

**Password:** xxxxxx

\*Password length varies

If user enters the wrong username or password they will get the following error message

Click "OK" and re-enter the username and password.

	SFDB Operating Procedures	<b>Effective</b> July 21, 1994	<b>Page</b> 2.3

After a successful login, the SFDB main screen will appear:

The main window has seven menu options: **Reports**, **Tables**, **SFDB Update Process**, **Facility/Custodial Process**, **Action**, **Help**, and **Window**.

Note: There are two additional menu options that are displayed in certain screen: **Query** and **Record**.

You can navigate through the menu by using the keyboard or the mouse. Users can press the [Alt] key to access the menu and then [Enter] to access sub-menus.

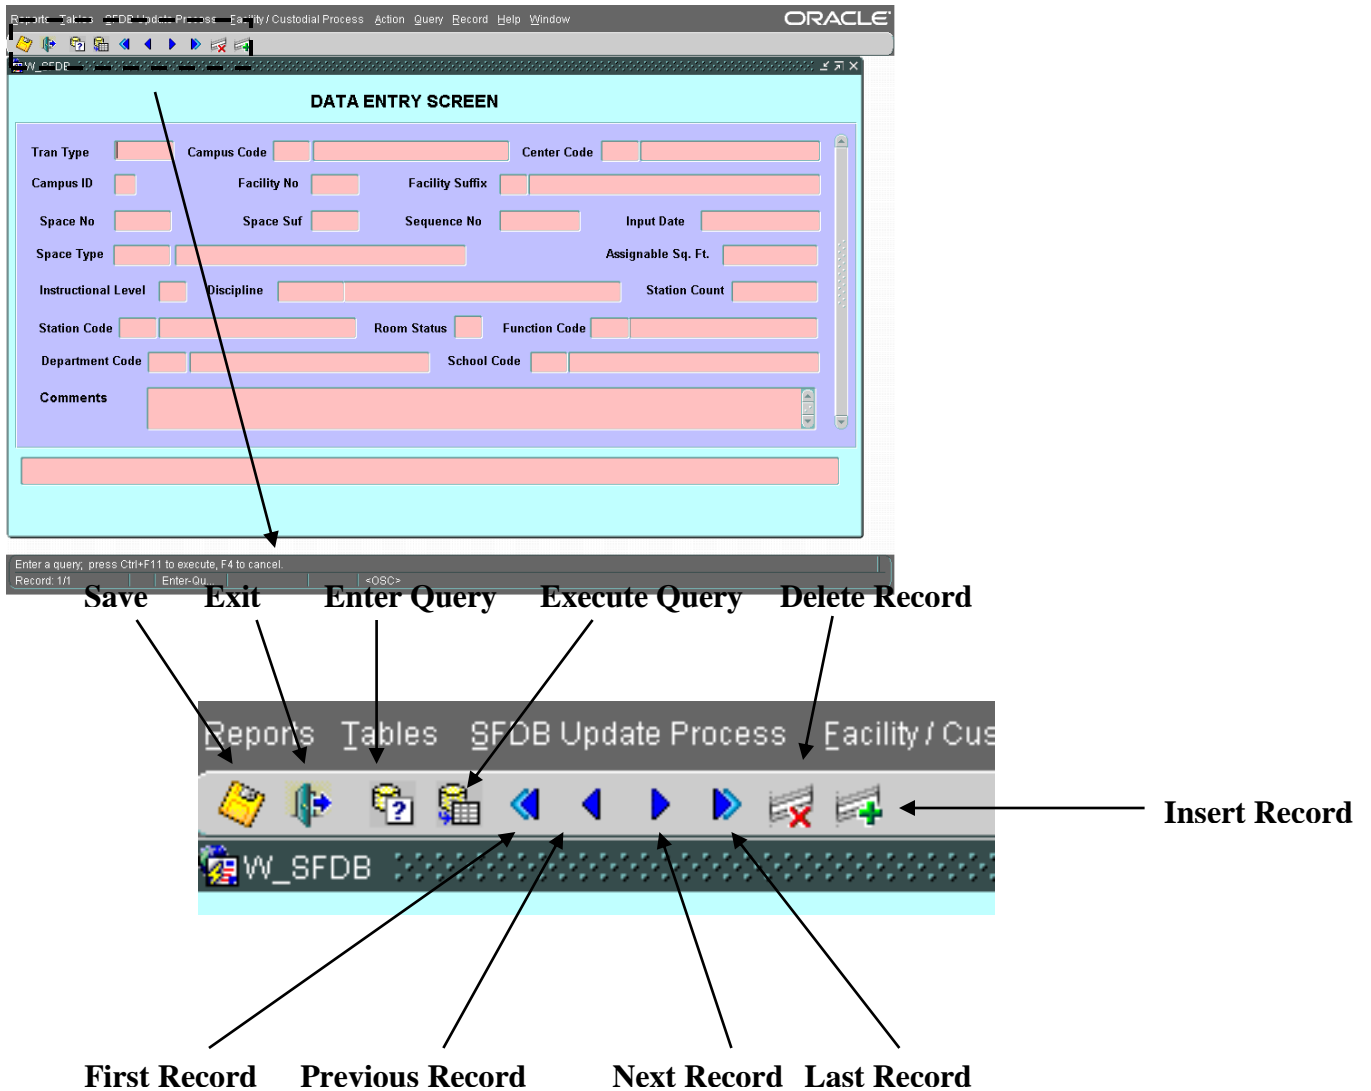

When instructions refer to function keys and other keys, they are enclosed by square brackets [ ]. For example, [Insert] implies that the user will depress the key designated as the insert key. For functions that are shown in “ ” means it can be accessed with a mouse cursor.

Functions keys can be found on page 2.13

## Icon Menu

When user is in a screen mode, there is a row of menu icons that pop up right below the menu. All menu icons are also accessible in one of the following three menus: “Query”, “Record”, and “Action” menu.

	SFDB Operating Procedures	<b>Effective</b> July 21, 1994	<b>Page</b> 2.5

When you select menu 1. **“Reports”** from the main menu, the following screen will appear:

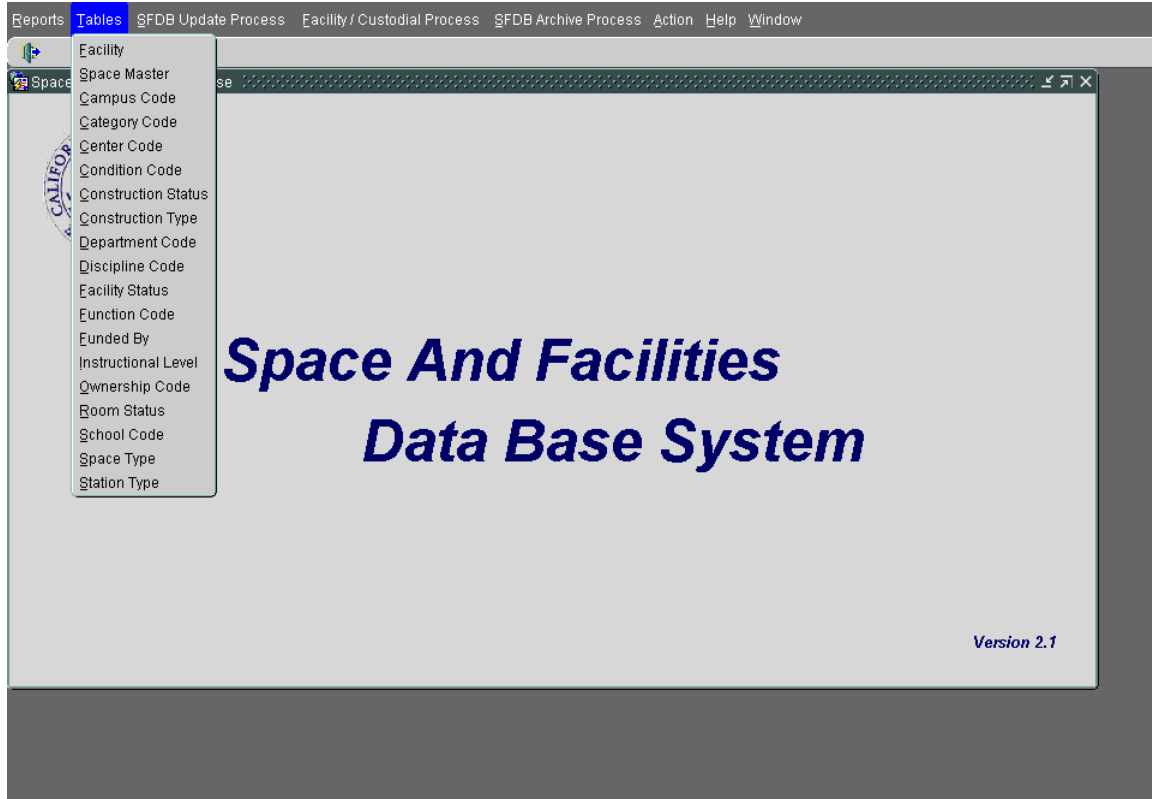

Campus users can generate reports by building type.

See Chapter 5 for additional details on how to run reports from the **“Report”** sub-menu.

To select a sub-menu option use the [UP/DOWN ARROW] keys to highlight the menu name. When you have made a selection, press [ENTER] and the system will display sub-menu chosen.

	SFDB Operating Procedures	<b>Effective</b> July 21, 1994	<b>Page</b> 2.6

## 2. "Tables" Access

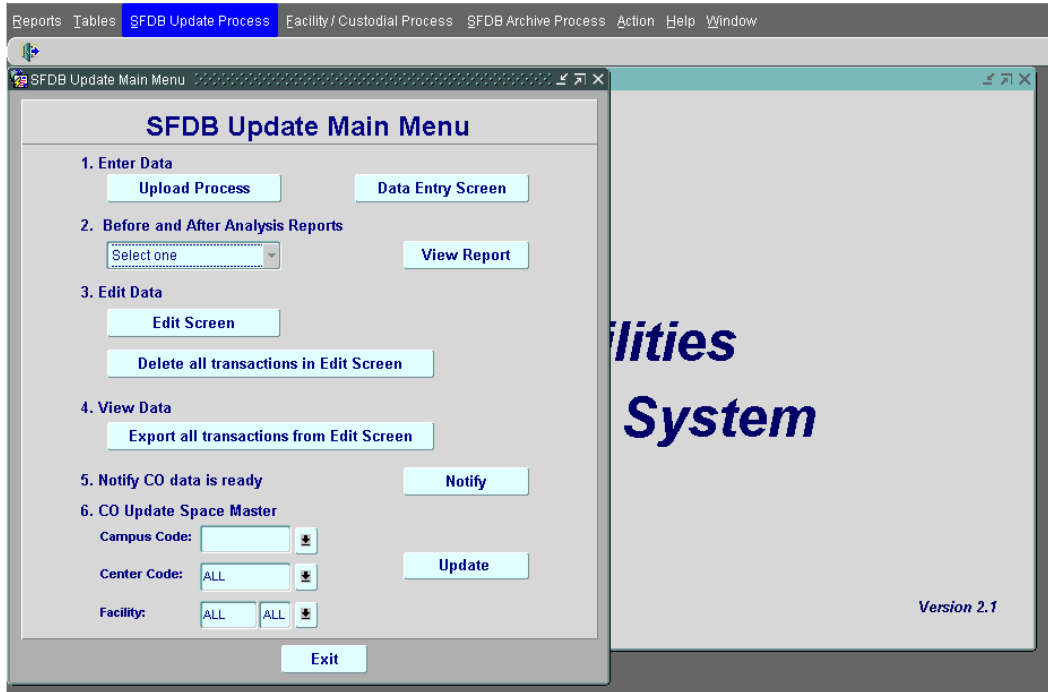

There are 19 different tables, which are read only for campus users. See Chapter 3 for additional details of the tables.

To select a sub-menu option use the [UP/DOWN ARROW] keys to highlight the menu name. When you have made a selection, press [ENTER] and the system will display the sub-menu chosen.

### 3. “SFDB Update Process”

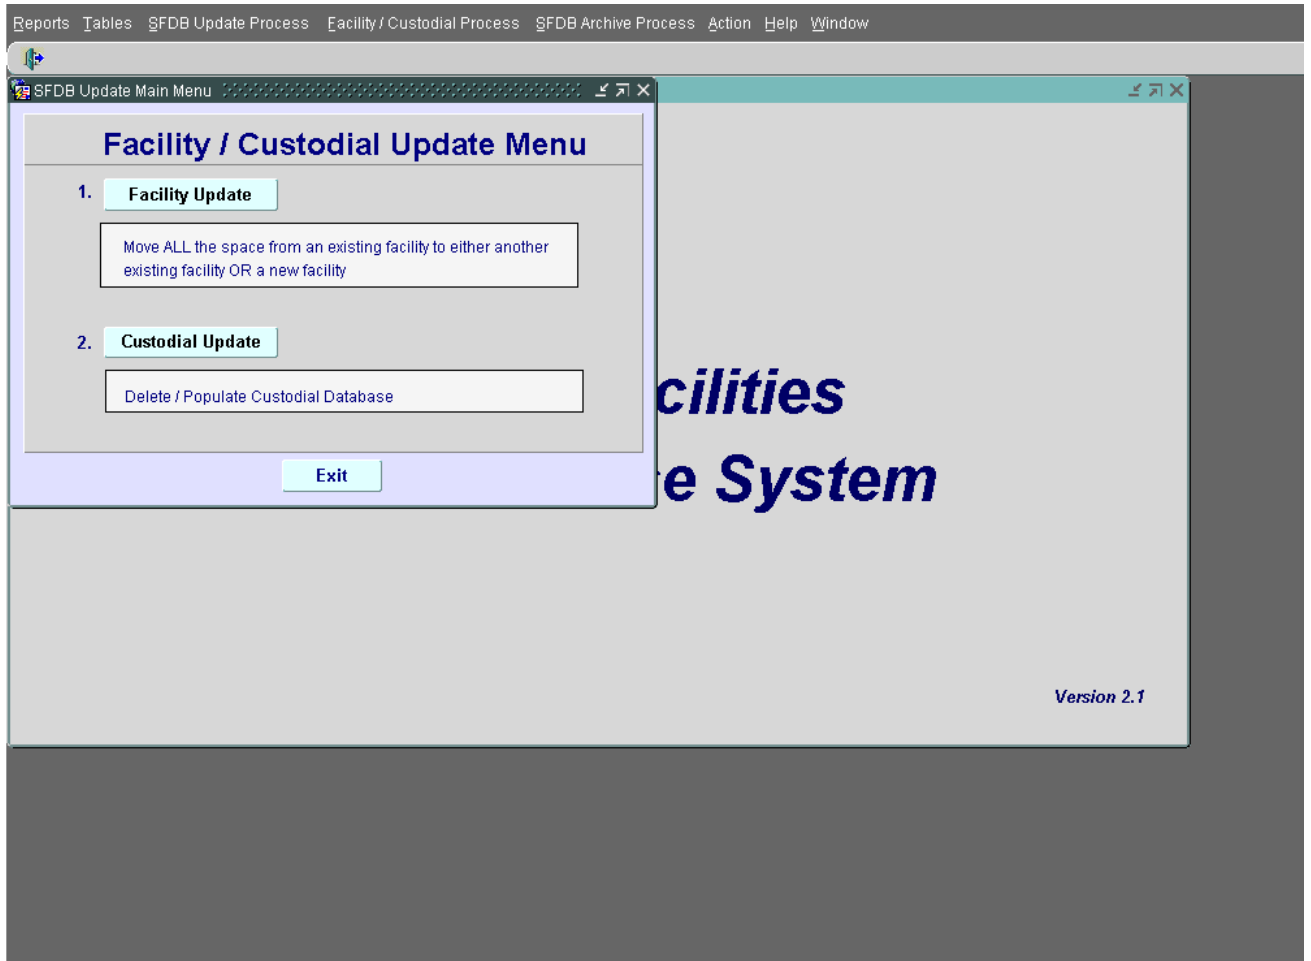

SFDB Update Process allows campus to submit yearly updates when the update window is open. The update process can also be used as a tool throughout the year. Campus can upload their project information and run before and after reports to see the effects of a certain project. The process will allow campus with direct data entry, auto data validation, and space update analysis, and reporting tools.

In July 2004, two types of reports have been added to SFDB: Room by Room Detail Report or Summary Report. These reports will compare current SFDB data and the proposed SFDB data and show the difference.

Please see Chapter 3 for detailed instructions on updating data and viewing reports.

4. **“Facility/Custodial Process”** is for CPDC, Space Management use only. Campus will not have access to these two options.

	SFDB Operating Procedures	<b>Effective</b> July 21, 1994	<b>Page</b> 2.10

6. **“Action”** from the main menu, the following screen will appear:

The screenshot shows a web browser window titled 'W\_SFDB'. The menu bar includes 'Reports', 'Tables', 'SFDB Update Process', 'Facility / Custodial Process', 'SFDB Archive Process', 'Action', 'Query', 'Record', 'Help', and 'Window'. The 'Action' menu is open, displaying 'Save', 'Exit', 'Clear All', and 'Change Password'. The main content area is titled 'DATA ENTRY SCREEN' and contains the following fields:

- Tran Type:
- Campus Code:
- Center Code:
- Campus ID:
- Facility No:
- Facility Suffix:
- Space No:
- Space Suf:
- Sequence No:
- Input Date:
- Space Type:
- Assignable Sq. Ft.:
- Instructional Level:
- Discipline:
- Station Count:
- Station Code:
- Room Status:
- Function Code:
- Department Code:
- School Code:
- Comments:

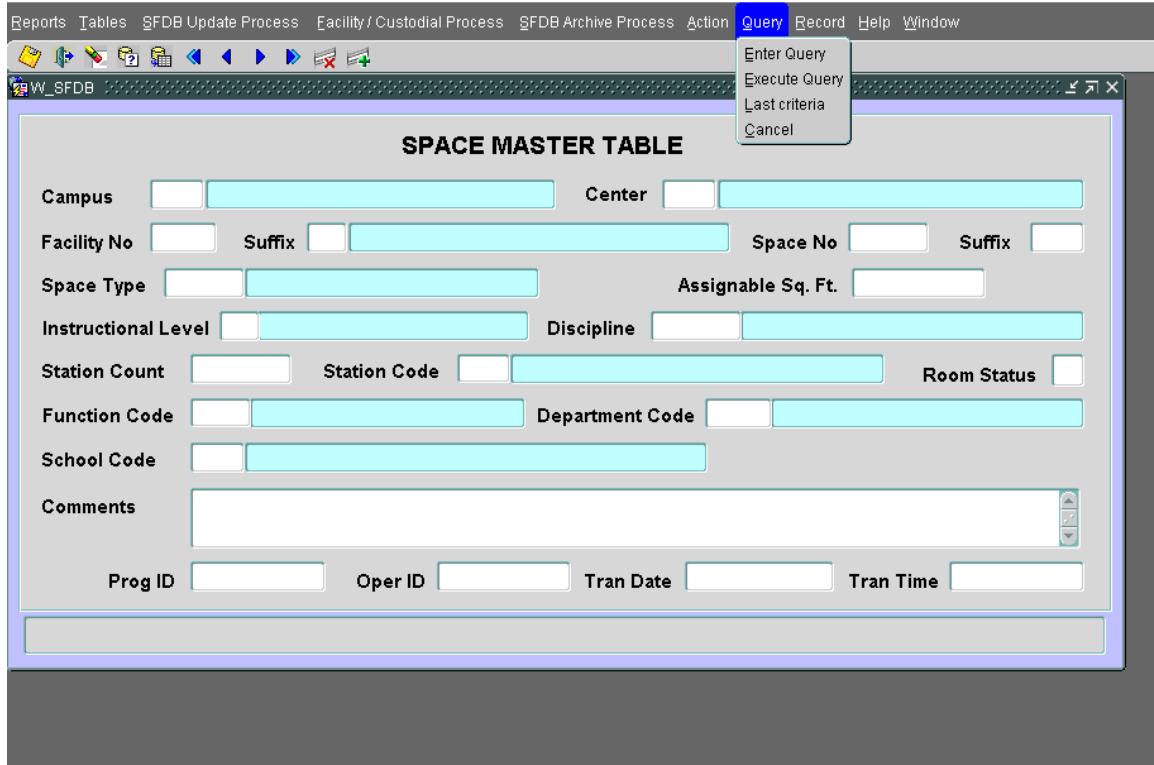

Once data has been entered in the “Data Entry” screen or “Edit” screen, users can “Clear All” or can “Save” the record.

**ALWAYS** use the “Exit” command to log out of ORACLE. This will ensure all changes made to record(s) are saved correctly.

See Chapter 3 for instructions on how to add new space and/or how to modify existing space.

When you select menu in 7. “Query” from a screen:

Note: “Query” menu option is only available when a menu item is selected.

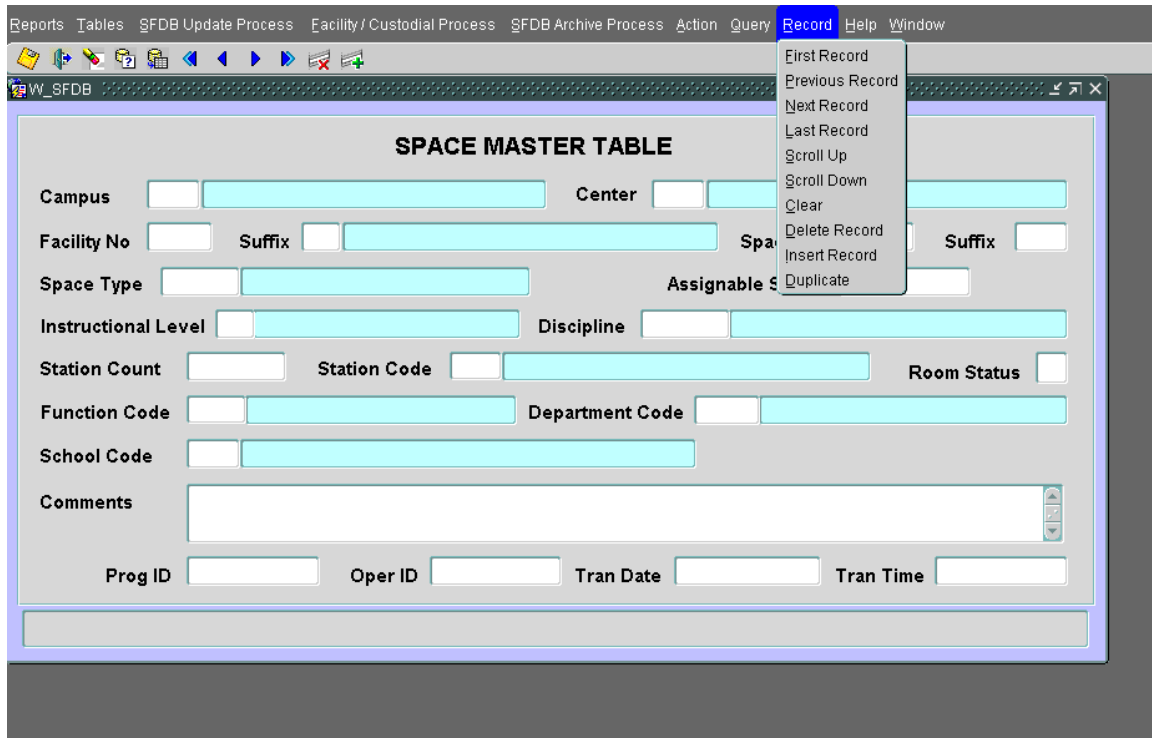

The sub menus in “Query” allow user to query and view space data that has been previously entered.

Refer back to page 4 for the use of the menu icons.

See page 3.12 for instructions on how to query.

When you select menu 8. **“Record”** from a screen:

Note: “Record” menu option is only available when a screen is viewed.

Once a user “Query” records from the specific screen, use options from the “Record” menu to navigate through the records. User has the option to “Scroll Up” or “Scroll Down” and the option to view records forwards or backwards. Under “Query” menu, user may “Clear” all the views in order to process another query. If a campus user has editing rights then they can “Delete Record” and/or “Insert Record” from the screens.

Refer back to page 4 for the use of the menu icons.

See Chapter 3, for instructions on how to modify a record.

9a. "Help"

The screenshot shows a software window titled 'W\_SFDB' with a menu bar containing 'Reports', 'Tables', 'SFDB Update Process', 'Facility / Custodial Process', 'SFDB Archive Process', 'Action', 'Query', 'Record', 'Help', and 'Window'. The main area is a form titled 'SPACE MASTER TABLE' with various input fields. A 'Help' menu is open over one of the fields, showing options: 'Help', 'Keys', 'List', 'Display Error', and 'Debug'. The form fields include:

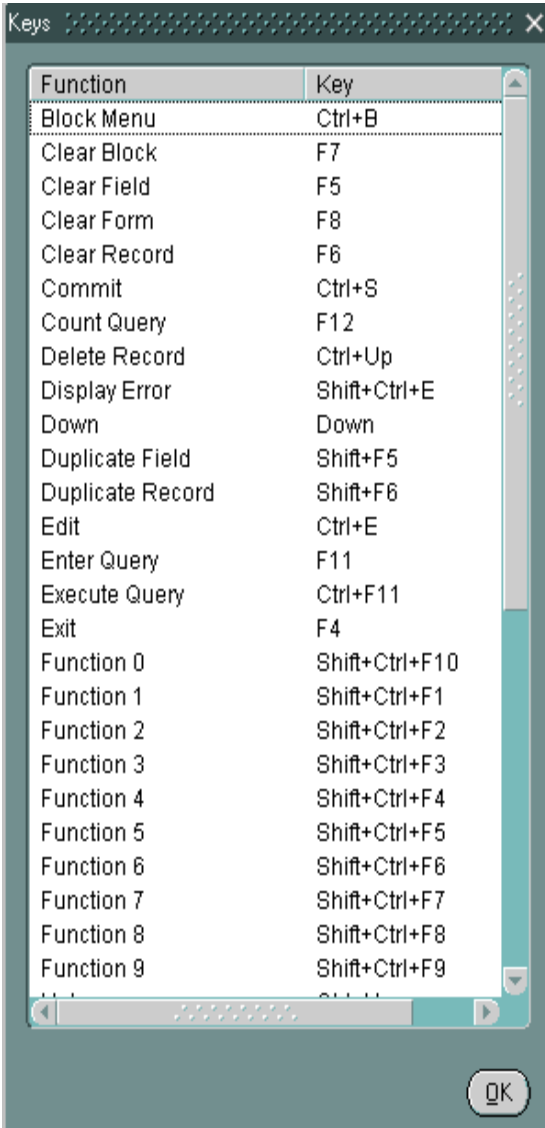

- Campus:
- Center:
- Facility No:  Suffix:
- Space No:  Suffix:
- Space Type:  Assignable Sq. Ft.:
- Instructional Level:  Discipline:
- Station Count:  Station Code:  Room Status:
- Function Code:  Department Code:
- School Code:
- Comments:
- Prog ID:  Oper ID:  Tran Date:  Tran Time:

When the cursor is in a particular field, "Help" is available to see the properties of that field. For example, if the cursor was in the 'Trans Type' and you select "Help", a dialog box will pop up with attributes and values of this field.

9c. If applicable, a field can be given a list of choices from the “List” function.

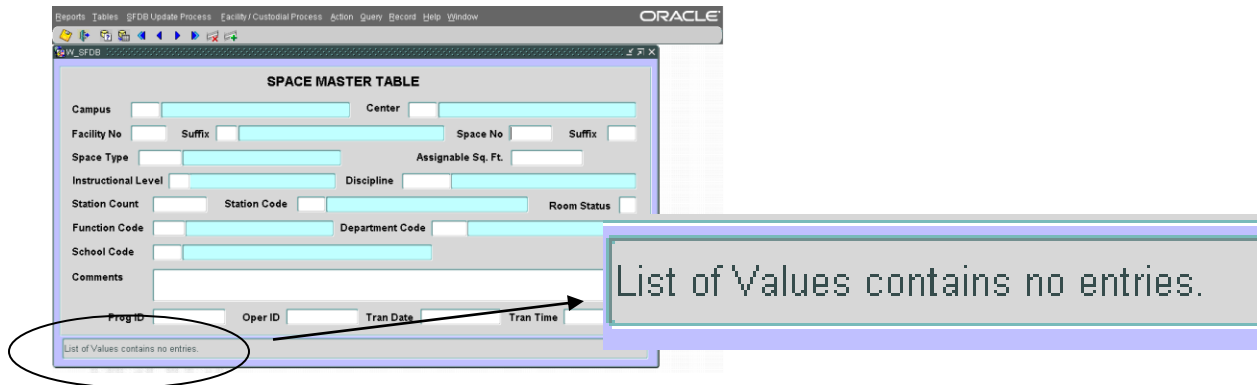

The valid values for some fields are contained in a table. Users can access these values from a table by choosing “List” or double clicking on the field.

For example, the above shows a list of Space Codes and Space Types.

All available tables can be found in the Appendix.

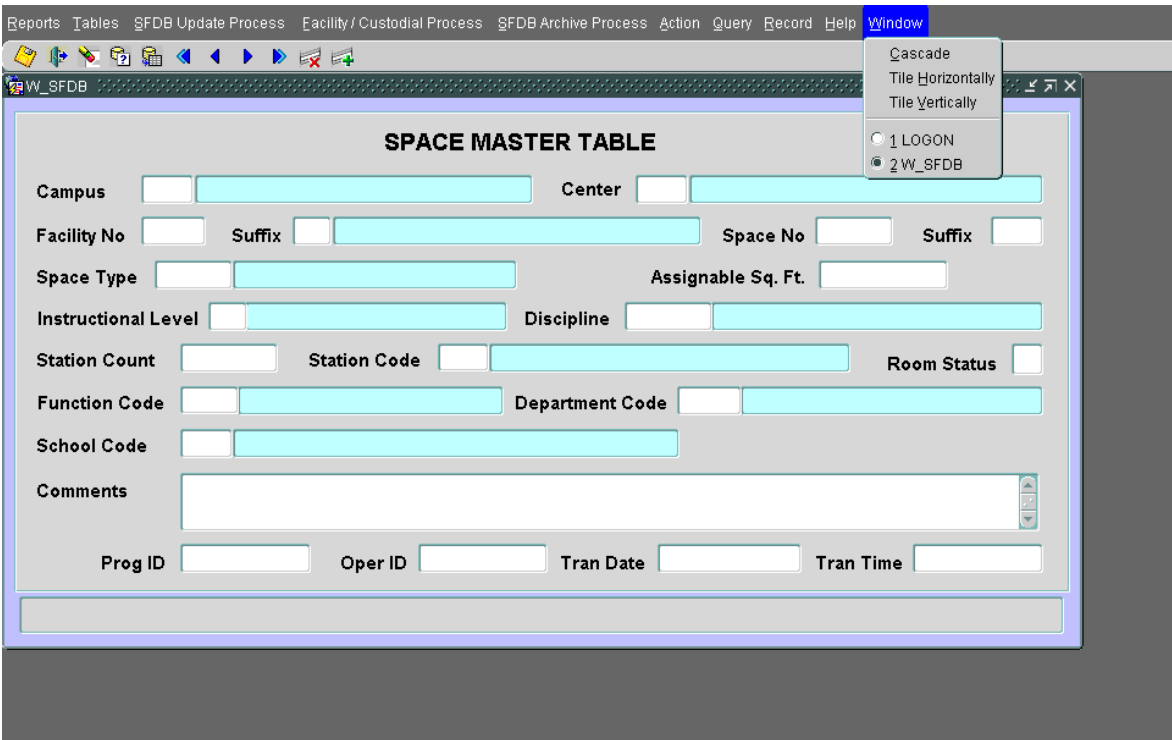

Note: ORACLE will display an error at the bottom of the screen if the field has no list choice.

9d and 9e “**Display Error**” and “**Debug**” allow the user to see errors that were made during the editing screens. And helps you to debug all errors.

10. “**Window**” menu allow the user to track open screens and customize the way in which multiple screens appear in the window.

- stacked so that only their title bars are visible.
- “Tile Horizontally” view allows all screens to appear in horizontal rows.
- “Tile Vertically” view allows all screens to appear side by side.
- You may also switch between the different screens that are listed.

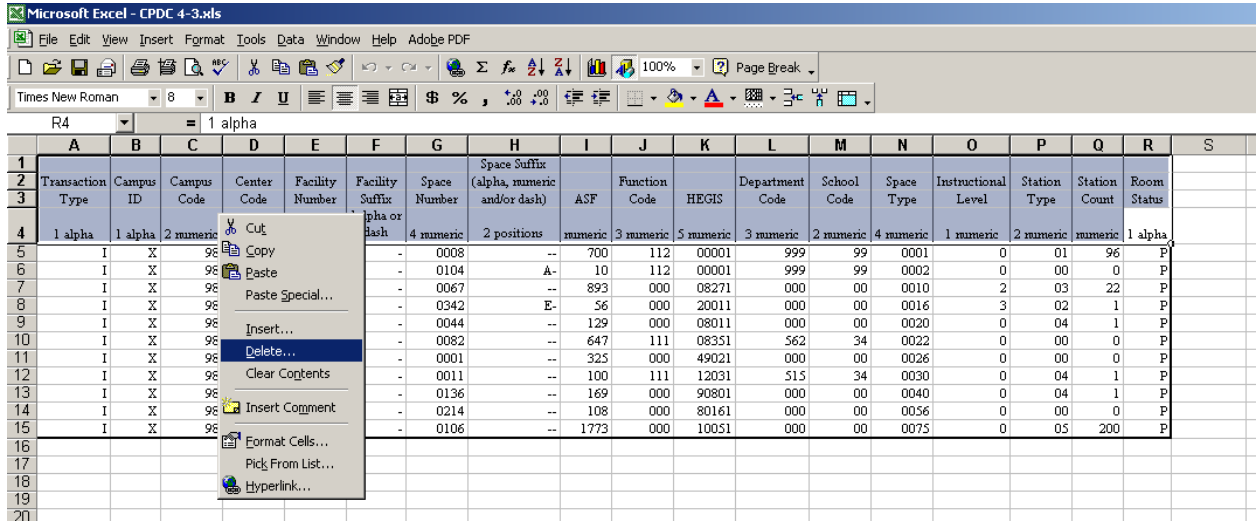

When user is finished, remember to “Exit”  the screen and the window in order to save all changes that were made.

- Once you have input all space update data, users should delete all headings. This will simplify the process as we proceed to the next step.

- Saving this document: (1) each FTP transaction transfer file must be named as "sfdbtranXX" (XX is your campus code) and (2) from the "Save as type" menu choose the "Text (Tab-delimited) (\*.txt)".

## SFDB Update Process Overview – Step by Step

- Step One: Enter Data
- Step Two: Before and After Analysis Reports
- Step Three: Edit Data
- Step Four: View Data
- Step Five: Notify Chancellor’s Office

### Step One: Enter Data

Please refer to Chapter 2 on how to log into SFDB. Once logged into SFDB, select “SFDB Update Process” to get to the SFDB Update Main Menu.

- There are two ways campus can submit data: through (Option 1) Select and Upload Submission file or (Option 2) Data Entry Screen. Campus can always use both if needed.

<b>SPACE AND FACILITIES DATA BASE MANAGEMENT SYSTEM USER'S MANUAL</b>	<b>Subject</b>  SFDB Update Process	<b>Revision</b> March 2008	<b>Chapter</b> Chapter 3
		<b>Effective</b> July 21, 2004	<b>Page</b> 3.4

**(Option 1) Select and Upload Submission file**

Click on the “Upload Process” button

The screenshot shows the 'SFDB Update Main Menu' with several sections:

- 1. Enter Data:** Contains 'Upload Process' and 'Data Entry Screen' buttons.
- 2. Before and After Analysis Reports:** Includes a 'Select one' dropdown menu and a 'View Report' button.
- 3. Edit Data:** Features an 'Edit Screen' button and a 'Delete all transactions in Edit Screen' button.
- 4. View Data:** Contains an 'Export all transactions from Edit Screen' button.
- 5. Notify CO data is ready:** Includes a 'Notify' button.
- 6. CO Update Space Master:** Has input fields for 'Campus Code', 'Center Code' (with 'ALL' selected), and 'Facility' (with two 'ALL' selections). An 'Update' button is to the right.

An 'Exit' button is located at the bottom center of the menu.

and the following window will appear

The screenshot shows a window titled 'SFDB EDIT SUBMISSION' with two main sections:

- 1. Select and Upload File:**
  - Instructions: "Data file must be in text (tab delimited format) and named as 'sfdbtranXX.txt' (XX = campus code)"
  - Field: 'File Name:' with a text input box and a 'Browse' button.
  - Buttons: 'Upload' and 'Cancel'.
- 2. Validate Submission File:**
  - Field: 'Campus Code:' with a text input box containing '60'.
  - Field: 'Campus Name:' with a text input box containing 'Sacramento'.
  - Text: "Enter my e-mail address (to notify me of validation's completion)"
  - Field: An empty text input box for the email address.
  - Buttons: 'Validate My Data' and 'Return to SFDB Update Menu'.

The Upload Process is a two step process:

### 1) Select and Upload File

Click "Browse" button to display the directories on your computer.

The screenshot shows a web browser window titled "SFDB EDIT SUBMISSION". The interface is divided into two main sections:

**1. Select and Upload File**

Data file must be in text (tab delimited format)  
and named as "sfdbranXX.txt" (XX = campus code)

File Name:

---

**2. Validate Submission File**

Campus Code:

Campus Name:

Enter my e-mail address (to notify me of validation's completion)

		<b>Effective</b> July 21, 2004	<b>Page</b> 3.6

- a. Select "Home" icon to display directories
- b. Select the Desktop folder

- d. Select submission file to be uploaded  
Remember to use the file named: "sfdbtranXX.txt" (XX = campus code), and data must be in text (tab delimited format)

- e. Select "Open"

f. Click "Upload" to move the submission file to the CO server.

The screenshot shows a web browser window titled "SFDB EDIT SUBMISSION". The window is divided into two sections:

**1. Select and Upload File**

Data file must be in text (tab delimited format) and named as "sfdbtranXX.txt" (XX = campus code)

File Name:

---

**2. Validate Submission File**

Campus Code:

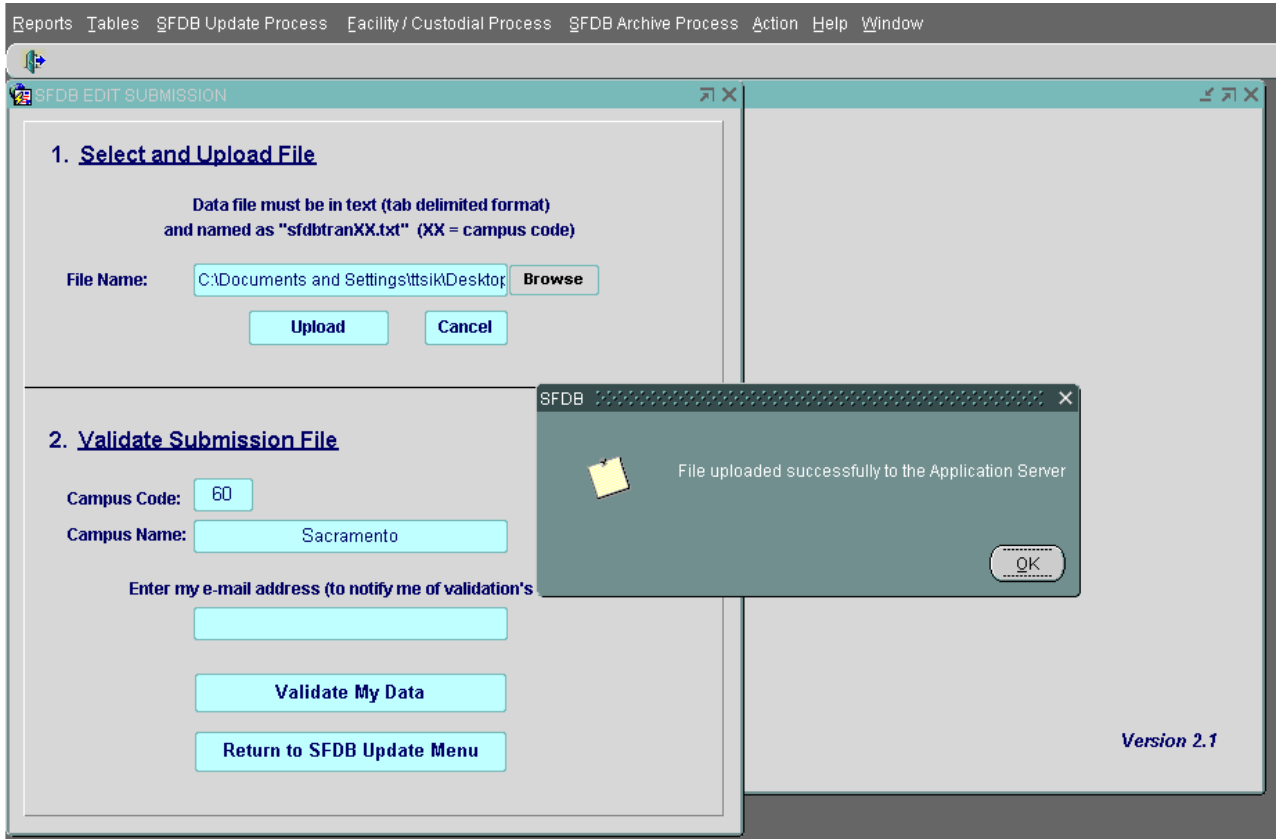

Campus Name:

Enter my e-mail address (to notify me of validation's completion)

An arrow points from the "Upload" button in the first section to the "Validate Submission File" section header.

**Tran Type “I”: Insert (adding) new update**

- a. Click “Enter Query” icon
- b. Enter query data in key fields: such as Campus code, Center code, and/or Facility No.
- c. Click “Execute Query” icon to view the data you request
- d. Use [Page Down] or  to look through the query
- e. Click on “+” sign to add a new space

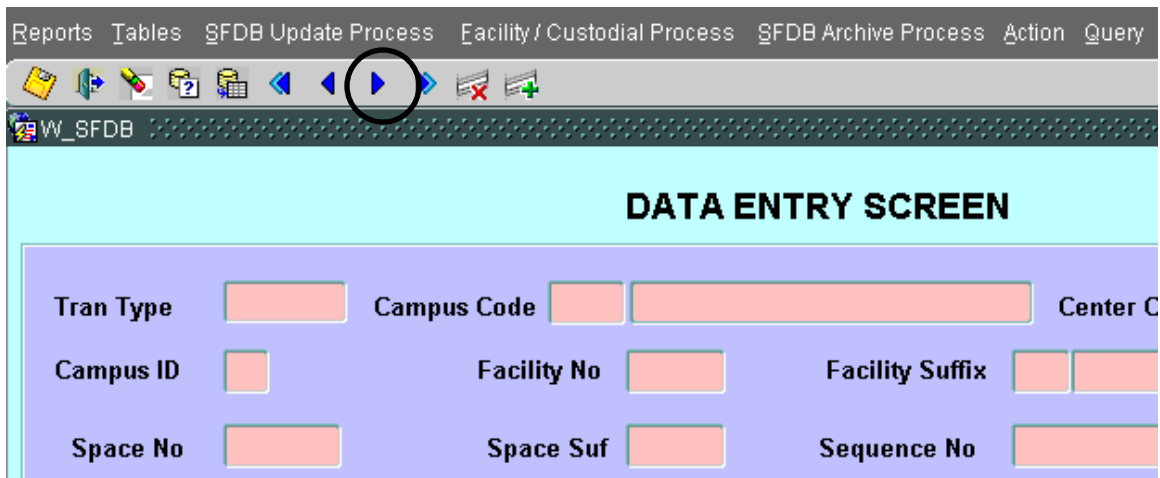

- f. Type in data in each required key fields, use [Tab] to skip to the next field  
Be sure to add “I” in the tran type field to update space.
- g. Save:
  - Select “Save” from menu “Action”
  - Click save icon
  - OR
  - [Ctrl] + [S]

Note: Once users save a new transaction, users need to use the Edit Screen to make changes. See page 3.18 for additional help with Edit Screen.

### Step Two: Run Before and After Reports

**Room by Room Review** – this report shows the comparison of each individual room in the current SFDB against any new room updates processed by the campus.

**Summary Report** – there are four types of report users can choose from. Please see chart below to see what kind of information you would like to view.

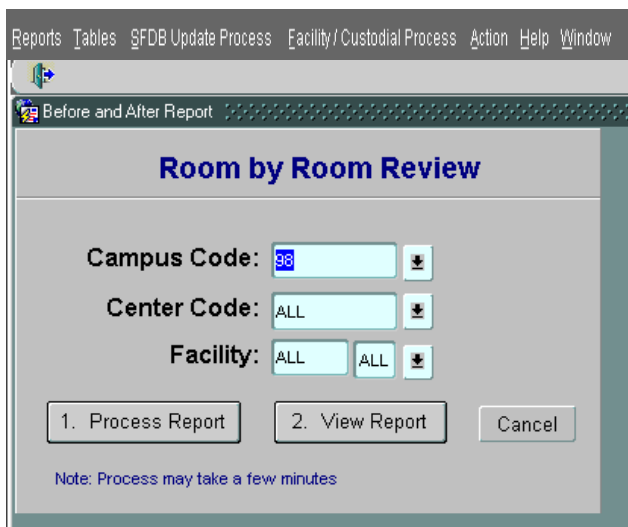

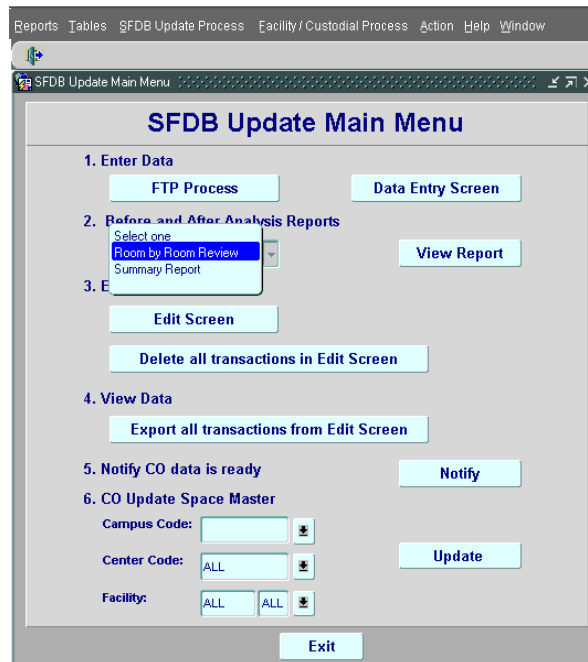

**Capacity Analysis Report** – this report compares campus capacity spaces, which includes lecture, lab, faculty office, faculty admin office, and ASF. Users can also choose to view spaces that are in permanent or temporary buildings.

Type of Report	Report Content

## Room by Room Report

To run this report, from the pull down menu, select Room by Room Review, and click “View Report”.

### Processing and viewing the report

1. User's campus code should already be in the Campus Code box. If not, users need to enter their campus code.
2. Enter center code and facility number to see specific space information. If users would like to view all the spaces on the campus, users may leave center code and facility as “All”.
3. Click on “1. Process Report” so the system can generate the information being requested.
4. Click on “2. View Report”.

Note: process may take a few minutes; depending on how much updates campus has submitted.

### Step Three: Edit Data

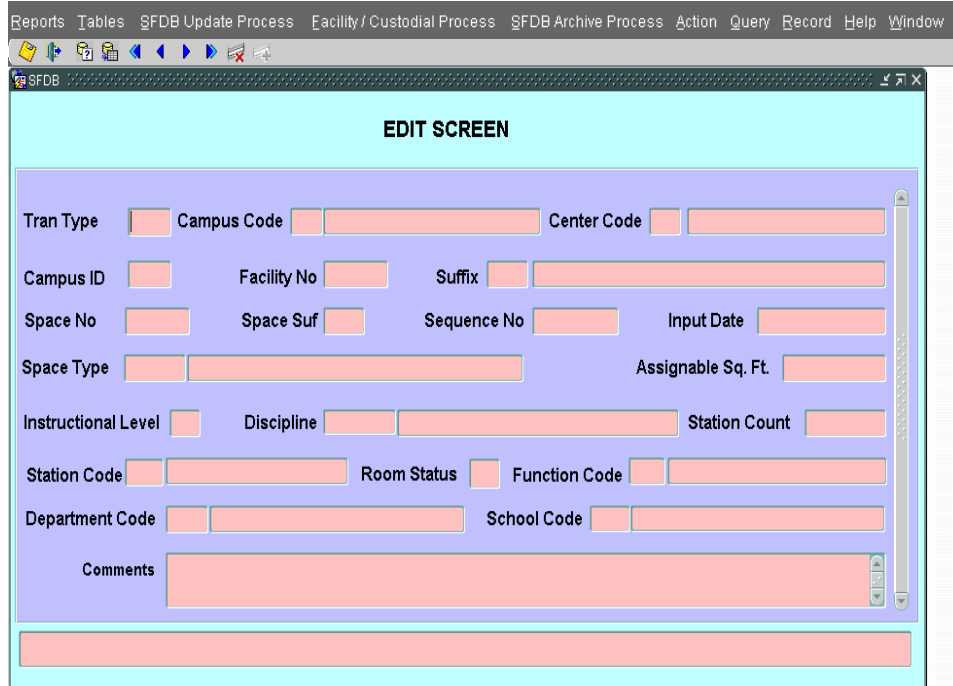

Once all updated space data are entered through either Upload Process or Data Entry Screen, campus can go into Edit Screen to make additional edits.

Notes:

- ❖ All transactions in Data Entry Screen “move” to the Edit Screen once the transaction is saved.
- ❖ Can view and edit data
- ❖ Can delete and update existing space transaction
- ❖ CANNOT insert a new transaction. Must use Data Entry Screen or add in the CPDC 4-3 file and run the Upload Process again.
- ❖ Transaction Type is based on the data in the SFDB
- ❖ SAVE CHANGES FREQUENTLY
- ❖ Every time campus upload submissions, any submissions made earlier either through Upload Process or Data Entry, will be erased. Campuses need to make sure they export all data from "View Data" option and save.

#### 1) Browse records in Edit Screen

- a. Click “Enter Query” icon
- b. Enter query data in fields: such as Center code, Facility No., Space No., Space Type, etc.
- c. Click “Execute Query” icon to view the data you request
- d. Use Page Down key or  to locate the space you want to update

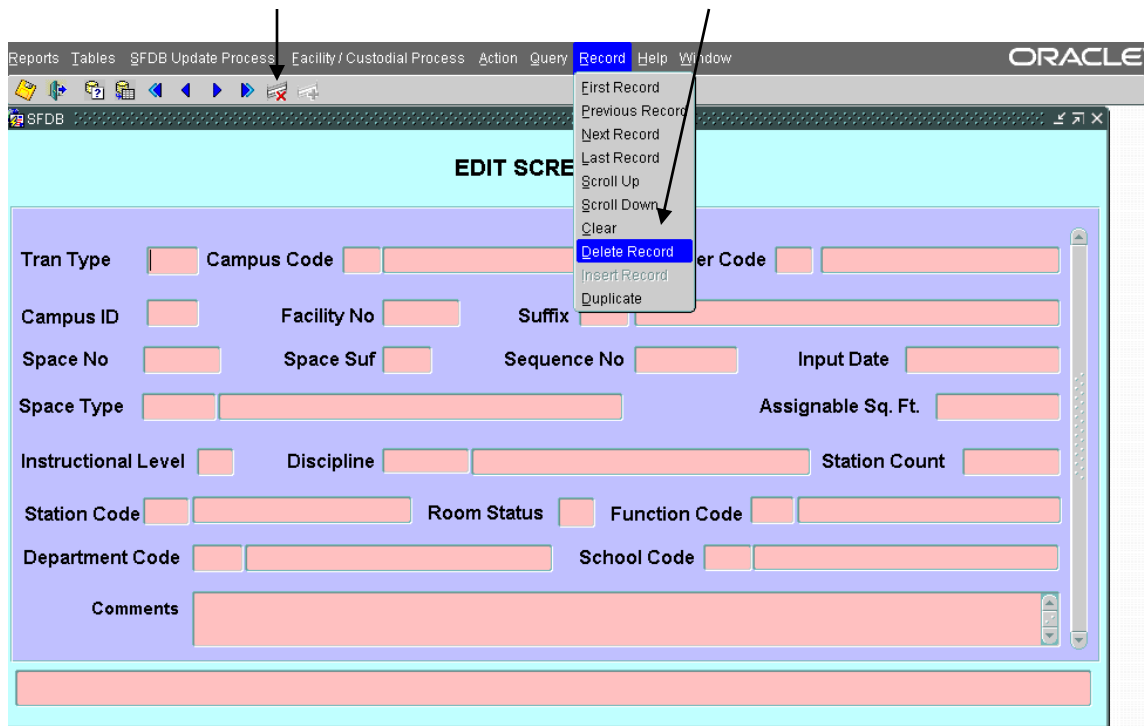

The screenshot shows the 'EDIT SCREEN' interface with the following fields:

- Tran Type
- Campus Code
- Center Code
- Campus ID
- Facility No
- Suffix
- Space No
- Space Suf
- Sequence No
- Input Date
- Space Type
- Assignable Sq. Ft.
- Instructional Level
- Discipline
- Station Count
- Station Code
- Room Status
- Function Code
- Department Code
- School Code
- Comments

## 2) Edit / Delete Data (only tran type “D” and “U” are allowed)

1. Query the space transaction that needs to be change or delete.
2. Change data of any transactions that were already submitted through the Upload Process or Data Entry Screen.
  - Change Tran Type from “D” to “U” (or “U” to “D”).
  - Use Tab key to move to the field you want to change and type in updated data.
  - SAVE CHANGES.
3. Delete from screen (do not want to include this transaction in the SFDB).
  - Click “X” delete icon on screen **or** select “Delete Record” from menu “Record”.

- SAVE CHANGES.

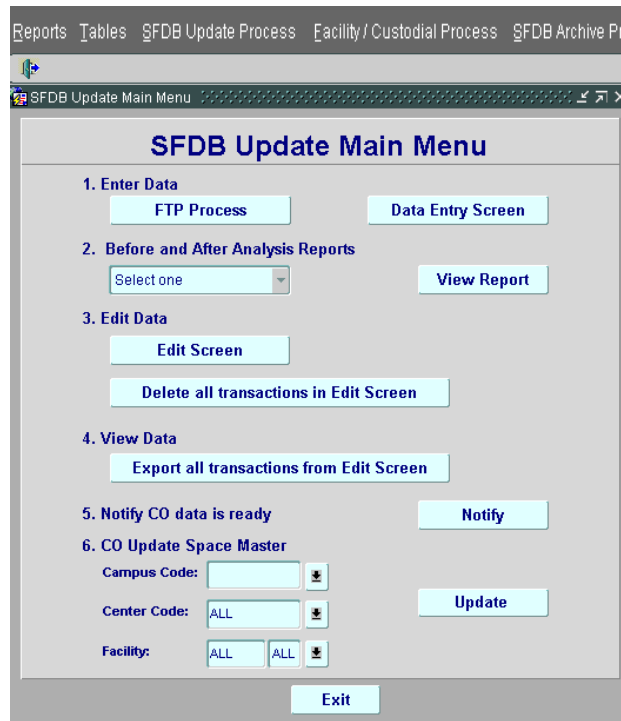

## 3) Exit Edit Screen

- Click exit icon.
- Select “Exit” from menu “Action”.
- Click “X” to close the window.

#### Step Four: View Data

1. Campus user can always view what they have submitted in the Campus Edit Screen by clicking on the “Export all transactions from Edit Screen”.
2. Enter campus code and click “Export Data”.

3. A separate window will appear, displaying all the transactions that have been entered through the Upload Process and/or Data Entry Process.

Campus may follow a few steps and view the export file in a CPDC 4-3 format.

### Save and View Data in CPDC 4-3 Format

1. Go to "File" and choose "Save As"
2. Once the **Save Web Page** menu opens the file name will be set to the default name "campus\_tran\_SFDBXX01"
3. Then from the "Save as type" choose .txt format.

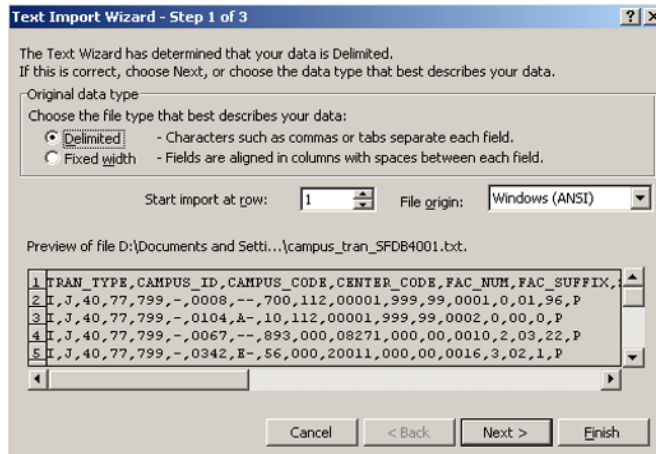

4. Then from Microsoft Excel application, open the .txt file just saved.
  - In this example, go to Desktop and open "campus\_tran\_SFDB4001.txt".

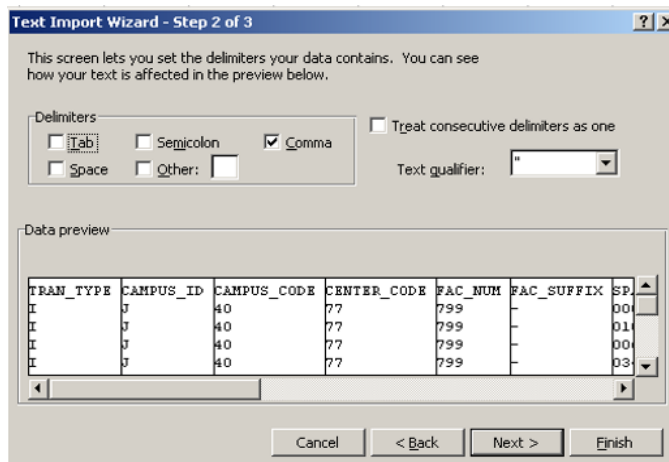

Note: Users may need to select "All Files (\*.\*)" from the dialog box in order to show the .txt file.

### Step Five: Notifying the Chancellor's Office

- After submitting/editing all final transactions, campus can use the “Notify” button to let the CO-Space Management know that the submission is ready to view.

- CO will review all proposed SFDB updates and contact campus if there are any questions.
- Once campus and CO agree with the update, the Space Master will be updated.

- Updated space and facility reports available to campuses:
  - Pre-defined PDF reports on web Space and Facilities Data Base System
  - OnDemand Server for export to Excel or Word format

### Access to SFDB Standard Reports Generation

The Space and Facilities Data Base (SFDB) provides essential information relating to facility planning, space planning and utilization. This data serves as a foundation to capital planning processes, and are critical to the process. Reports are accessible at any time through online access

**Step 1.** Log on to SFDB. (See Chapter 2 for details on how to log on)

**Step 2.** Retrieving Specific Standard Report

From the “Report” menu select the report you would like to create.

<b>SPACE AND FACILITIES DATA BASE MANAGEMENT SYSTEM USER'S MANUAL</b>	<b>Subject</b>  Campus Transaction Record Layout	<b>Revision</b> May, 2008	<b>Chapter</b> Appendix A
		<b>Effective</b> July 21, 2004	<b>Page</b> A.16

**Number:** 16

**Data Element Name:** Station Type

**Column Name:** st\_code

**Type:** num

**Length:** 2

**Beginning Position:** 041

**Ending Position:** 042

**Format:** See Code Interpretation

**General Description:** A code describing the type of stations contained within a particular space.

**Code Interpretation:**

<u>Code</u>	<u>Station Type</u>
00	Not Applicable
01	Tables and Chairs
02	Tablet Armchairs
03	Built-in Workstations
04	Desks and Chairs
05	Auditorium Seating
06	Other Fixed or Tiered Seating
07	Bed
08	Furniture
09	Other or Unknown
10	Computer Workstation
11	Library Carrel
12	Combination

**Note:** 1. The "list" function is available (see Chapter 2, pg 2.13 for details of "list" function).

<b>SPACE AND FACILITIES DATA BASE MANAGEMENT SYSTEM USER'S MANUAL</b>	<b>Subject</b>  Campus Transaction Record Layout	<b>Revision</b> May, 2008	<b>Chapter</b> Appendix A
		<b>Effective</b> July 21, 2004	<b>Page</b> A.17

**Number:** 17

**Data Element Name:** **Station Count**

**Column Name:** num\_sta

**Type:** num

**Length:** Minimum of 1

**Beginning Position:** 043

**Ending Position:** 047

**Format:** Numeric OR zero MUST be used for blanks.

**General Description:** The number of work stations (students, faculty, etc.) in the room or space according to the space standards. In cases where extra stations have been placed in the room (in excess of the designed capacity of the room), report only those stations which represent the maximum capacity in accordance with the most recent space standards.

<b>SPACE AND FACILITIES DATA BASE MANAGEMENT SYSTEM USER'S MANUAL</b>	<b>Subject</b>  Campus Transaction Record Layout	<b>Revision</b> May, 2008	<b>Chapter</b> Appendix A
		<b>Effective</b> July 21, 2004	<b>Page</b> A.18

**Number:** 18

**Data Element Name:** Room Status

**Column Name:** rm\_status

**Type:** alpha

**Length:** 1

**Beginning Position:** 048

**Ending Position:** 048

**Format:** See Code Intepretation

**General Description:** A code indicating the status of the room in terms of the campus master plan. This corresponds to the status of the facility in which the room is located.

**Code Interpretation:**

<u>Code</u>	<u>Description</u>	
P	Permanent :	A space in a facility designated as permanent on the campus master plan.
I	Interim:	A space in a permanent facility which is being used temporarily for activities which are not those for which the space was designed or for which it will be permanently used. This designation should only be used to indicate temporary use during construction, remodeling, or repair of a permanent facility.
T	Temporary:	A space in a facility designated as temporary on the campus master plan. This includes leased facilities.

<b>SPACE AND FACILITIES DATA BASE MANAGEMENT SYSTEM USER'S MANUAL</b>	<b>Subject</b>	<b>Revision</b>	<b>Chapter</b> Appendix B
	Delete, Insert, Update	<b>Effective</b> October 1, 1994	<b>Page</b> B.1

DELETE (D): A delete means to remove an existing record.

INSERT (I): An insert means to add a new record. **ALL data elements** must be entered (see Appendix A for details on data elements).

UPDATE (U): An update means to change one or more data elements of an existing record. **ALL data elements** must be entered, even though only one element may be changing (see Appendix A for details on data elements).

To change a space number only and leave all the other information the same:

**First, DELETE** the entire record (Oracle will not allow the space number to be changed).

**Second, INSERT** the entire record again with the NEW space number.

To change only the FACILITY NUMBER (and/or name) with all the space information remaining the same, CPDC Space Management must be notified.

All **FACILITY** updates, deletes and inserts must be completed by CPDC Space Management.

<b>SPACE AND FACILITIES DATA BASE MANAGEMENT SYSTEM USER'S MANUAL</b>	<b>Subject</b>	<b>Revision</b> April 24, 2023	<b>Chapter</b> Appendix E
	Discipline Codes (definitions)	<b>Effective</b> October 1, 1994	<b>Page</b> E.1

The functional activity or organizational unit to which a room or space is assigned and which is actually occupying or using the space or is scheduled to do so.

The discipline codes consist of three units:

1. Interdiscipline unit

A space used for general purposes is considered as “all campus” and not under the jurisdiction of a particular instructional unit, and, therefore, is coded as “00001”. Lecture, seminar, and conference rooms are examples of interdisciplinary spaces. See Appendix D and/or F.

2. Instructional units

Instructional and instructional related spaces are assigned to the academic discipline or department as the discipline unit having jurisdiction over the space. The Higher Education General Information Survey (HEGIS) taxonomy of instructional programs has been adopted for this purpose.

3. Administrative and Instructional Support units

Administrative and instructional support spaces are assigned to the administrative or support department as the discipline unit having jurisdiction over the space. See the lists below for distinctions of non-state funded administrative and instructional support codes and state funded administrative and instructional support codes. Definitions follow.

**100 INSTRUCTION** This category includes all activities that are part of an institution's instruction program. Credit and noncredit courses, for academic, vocational, and technical instruction, for remedial and tutorial instruction, and for regular, special, and extension sessions should be included.

- 111 Instructional Administration**
- 112 Regular Instruction**
- 120 Special Session Instruction**
- 130 Extension Instruction**
- 180 Instructionally Related Activities**

**200 RESEARCH** This category should include all activities specifically organized to produce research outcomes, whether commissioned by an agency external to the institution or separately by an organizational unit within the institution. State funds include activities fully funded by a State or Local Governmental Entity. External Funds include activities partially/fully funded by private entities, the federal government or 501(c)(3) organizations.

- 210 Institutes and Research Centers – State Funds**
- 220 Individual and Project Research – State Funds**
- 230 Institutes and Research Centers – External Funds**
- 240 Individual and Project Research – External Funds**

**300 PUBLIC SERVICE** This category should include activities that are established primarily to provide noninstructional services beneficial to individuals and groups external to the institution.

- 310 Community Services**
- 320 Cooperative Extension Services**
- 340 Community Broadcast Services**

**400 ACADEMIC SUPPORT** This category should include support services for the institution's primary missions — instruction, research, and public service.

- 410 Libraries**
- 430 Audio-Visual Services**
- 440 Television Services**
- 450 Computing Support**
- 460 Ancillary Support**

**500 STUDENT SERVICES** This category should include offices of admissions and registrar and those activities whose primary purpose is to contribute to the student's emotional and physical well-being and to his or her intellectual, cultural, and social development outside the context of the formal instruction program.

- 510 Social and Cultural Development**
- 520 Supplementary Educational Services - EOP**
- 530 Counseling and Career Guidance**
- 540 Financial Aids**
- 550 Student Support**

**600 INSTITUTIONAL SUPPORT** This category should include: 1) central executive-level activities concerned with management and long-range planning of the entire institution, such as the governing board, planning and programming, and legal services; 2) fiscal operations, including the investment office; 3) administrative data processing; 4) space management; 5) employee personnel and records; 6) logistical activities that provide procurement, storerooms, safety, security, printing, and transportation services to the institution; 7) support services to faculty and staff that are not operated as auxiliary enterprises; and 8) activities concerned with community and alumni relations, including development and fund raising.

This category also should include the operation and maintenance of physical plants for all institutional activities, including auxiliary enterprises, and independent operations.

- 610 Executive Management**
- 620 Financial Operations**
- 630 General Administrative Services**
- 640 Logistical Services**
- 650 Physical Plant Operations**
- 651 Maintenance Office Administration**
- 652 Utility Plants**
- 653 Building Maintenance**
- 654 Grounds Maintenance**
- 655 Custodial Services**
- 660 Faculty and Staff Services**
- 670 Community Relations**

**700 INDEPENDENT OPERATIONS** This category includes those operations that are independent of, or unrelated to, but which may enhance the primary missions of the institution.

- 710 Institutional Operations**

**900 AUXILIARY ENTERPRISES** An auxiliary enterprise is an entity that exists to furnish goods or services to students, faculty, or staff, and that charges a fee directly related to, although not necessarily equal to, the cost of the goods or services.

- 910 Auxiliary Enterprises - Student**
- 920 Auxiliary Enterprises - Faculty/Staff**
- 930 Intercollegiate Athletics**
- 940 Subleased Area**

**0001  
Lecture**

**Definition:** A room used for classes that do not require special purpose equipment for student use.

**Description:** A lecture room may be equipped with tablet arm chairs (fixed to floor joined together in groups, or flexible in arrangement), tables and chairs, or similar types of seating. A lecture room may be furnished with special equipment appropriate to a specific area of study if this equipment does not render the room suitable for use by classes in other areas of study.

**Limitations:** This category does NOT include conference rooms or auditoriums. Seminar rooms that are typically used for small classes are defined separately and not included in this category.

**Validation Error Messages:**

ASF: ASF must not equal zero.  
 HEGIS: HEGIS must equal 00001.  
 inst\_level: Level must equal zero.  
 st\_code:  
 num\_sta: Stn count must not equal zero.

**0002  
Lecture Service**

**Definition:** A room which directly serves a lecture room as an extension of the activities of the lecture room.

**Description:** Included in this category are storage rooms, locker and shower rooms, closets, coatrooms, shops, dark rooms, laundry rooms, observation rooms, preparation and workrooms, study rooms, and preview rooms if they serve a lecture room.

**Limitations:** This category does NOT include coatrooms, preparation and storage rooms, closets, if such rooms serve laboratories, conference rooms, etc.

**Validation Error Messages:**

**0010  
Teaching Lab**

**Definition:** A room primarily used by regularly scheduled classes which require special-purpose equipment or treatment for student participation, experimentation, observation or practice in a field of study.

**Description:** A teaching laboratory is designed and/or furnished with specialized equipment to serve the needs of a particular area of study for group instruction in regularly scheduled classes. The design and/or equipment in such a room normally precludes its use for other areas of study. Included in this category are rooms generally referred to as instructional shops, drafting rooms, band rooms, group studios, and similar specially designed and/or equipped rooms **IF** they are used primarily for group instruction in regularly scheduled classes.

**Limitations:** This category does NOT include laboratory rooms that serve as individual (or independent) study rooms. It does NOT include laboratories used for group instruction that are informally or irregularly scheduled. This category does NOT include rooms generally referred to as research laboratories. It does NOT include gymnasiums, pools, or drill halls.

**Validation Error Messages:**

ASF: ASF must not equal zero.  
 HEGIS: HEGIS must be between 01000 and 49999.  
 inst\_level: Level must not equal zero.  
 st\_code:

**0011  
Teaching Lab  
Service**

**Definition:** A room which directly serves one or more teaching laboratories as an extension of other activities of the teaching laboratories.

**Description:** Such space is characteristically used for the preparation of course materials or lab assignments either by students or faculty, or for the temporary housing of materials and supplies frequently issued to students for laboratory classes. Included in this category are balance rooms, stock and equipment issue rooms, cold rooms, control rooms, dark rooms, drying and mounting rooms, preparation rooms, and similar facilities which directly serve a teaching laboratory.

**Limitations:** This category does NOT include animal rooms, greenhouses, departmental warehouses, or administrative stock rooms NOT directly related to teaching laboratories.

**Validation Error Messages:**

ASF: ASF must not equal zero.  
 HEGIS: HEGIS must be between 01000 and 49999.

**0016  
Research Space**

**Definition:** A room used primarily by informally scheduled classes or for special or independent study by graduate or advanced undergraduate students. Research space contains special purpose equipment for student participation, experimentation, observation or practice in a field of study.

**Description:** A research space is designed for and/or furnished with equipment to serve the needs of a particular area of study that normally limits or precludes its use for other areas of study. Note that the criteria for differentiating between a teaching laboratory and a research space is the nature of its scheduling and usage.

**Limitations:** This category does NOT include rooms generally referred to as teaching laboratories or self-instruction laboratories.

**Validation Error Messages:**

ASF: ASF must not equal zero.  
 HEGIS: HEGIS must be between 01000 and 49999.

**0017  
Research Service**

**Definition:** A room that directly serves one or more research space as an extension of the activities in those rooms.

**Description:** This category includes preparation rooms, workrooms, stock and equipment issue rooms, dark rooms, sterilizer rooms, observation rooms, and shops.

**Limitations:** This category does NOT include rooms that serve teaching laboratories or self-instruction laboratories.

**Validation Error Messages:**

ASF: ASF must not equal zero.

**0019  
Self-Instruction  
Computer Lab**

**Definition:** Space used to house computers that are used for self-instruction purposes.

**Description:** Such space provides access to the computing resources. This includes study activities, drills, exercises, research, analysis and development projects, individual and team assignments, case studies, written reports, and other assignments.

**Limitations:** This category does NOT include rooms used primarily as teaching laboratories even though such rooms house computers, i.e., computer science classes. It does NOT include space where computers are used for specialized purposes, such as measurement, monitoring, and control systems, or student support systems, such as career guidance computer applications. It does NOT include self-instruction laboratories used primarily for individual student experimentation, observation or practice in a particular field of study, such as computer-assisted instruction, language laboratories or specially equipped rooms used for remedial non-credit courses.

**Validation Error Messages:**

ASF: ASF must not equal zero.  
 HEGIS:  
 inst\_level: Level must equal zero.  
 st\_code: Must be 10.  
 num\_sta: Stn count must not equal zero.

**0020  
Self-Instruction  
Lab**

**Definition:** A specially equipped space used for self- instruction.

**Description:** Such space is primarily used for individual student experimentation, observation, or practice in a particular field of study. Included in this category are spaces used for computer-assisted instruction, teaching machines, listening and recording devices, and language laboratories used for instructional service purposes. Also included are specially equipped rooms used for remedial non-credit courses.

**Limitations:** This category does NOT include related spaces such as equipment repair and service shops, storage areas, administrative offices, and other spaces that should be classified under instructional support categories.

**Validation Error Messages:**

**0021  
Music Practice  
Studio**

**Definition:** A small room used for musical practice or rehearsal by individual students or small groups.

**Description:** A space used for musical practice by individuals or small groups of students.

**Limitations:** This category does NOT include spaces used for musical practice by bands, orchestras, ensembles, or other large groups (see Teaching Laboratory or Auditoria). It also does NOT include cases where instructor offices contain music space as well as office space.

**Validation Error Messages:**

ASF: ASF must not equal zero.  
 HEGIS: HEGIS must equal 10051 or 10041  
 inst\_level: Level must equal zero.

**0022  
Physical Education  
- Indoor**

**Definition:** For regularly scheduled physical education classes which require special equipment for student participation.

**Description:** Included in this category are indoor rooms generally referred to as gyms, auxiliary activity rooms, body mechanics rooms, dance studios, exercise rooms, handball courts, squash courts, wrestling rooms, swimming pools, ice rinks, physical fitness rooms, track areas, weight lifting rooms, field houses, etc.

Also included in this category are spectator seating areas and such related areas as locker rooms, clothing and equipment issue rooms, shower rooms, dressing rooms and directly related toilet areas.

**Limitations:** This category does NOT include lecture rooms, teaching laboratories, or offices even though they may be located in an athletic building. It does NOT include outside fields, tennis courts, archery or rifle ranges. It does NOT include restrooms for the general public. Other indoor non-instructional, but assignable space should be categorized under the appropriate support category (e.g., office, work preparation, stockroom, etc.).

**Validation Error Messages:**

ASF: ASF must not equal zero.  
 HEGIS: HEGIS must equal 08351, 08352, 08353, 08354, 08355 or 08356.
